The Narrative & Key Findings

DCLLTechnologies

What we UNCOVERED

5 Point Narrative

Business leaders agree – we're entering the next era of humanmachine partnerships.

2

But they're torn by what this means for them, their business and the world at large. We can see this division in the way that leaders forecast the future.

3

Leaders are struggling with the pace of change. They're not moving fast enough or going deep enough to overcome common barriers to operating as a successful digital business.

However, businesses are united in the need to transform and how.

5

Dell Technologies Point of View - transform IT, workforce and security today in order to leap ahead.

Entering the next era of human – machine partnerships

82%

say workforce and machines will work together as integrated teams **in 5 years**

26%

workforce and machines are **already** working together successfully as integrated teams

We've worked with machines for centuries, but our reliance on them is about to reach new levels.

Emerging technologies will open-up amazing new possibilities, unlike anything we've seen before.

A Divided Vision of the Future: Leaders are torn about what this shift will mean for them

Dell - Internal Use - Confidential

2030 Forecasts Our Lives

Automated systems will free-up our time

People will take care of themselves better with healthcare tracking devices

People will absorb and manage information in completely different ways

Smart machines will work as admins in our lives – connecting our lives to highly personalized goods and services

It will be harder to disconnect from technology

2030 Forecasts *Our Work*

We'll be more productive by collaborating more

We'll have more job satisfaction by offloading the tasks that we don't want to do to intelligent machines

Schools will need to teach how to learn rather than what to learn to prepare students for jobs that don't exist yet

We'll learn on the job with AR

Not sure what the next 10-15 years will look like for our industry, let alone our employees

	Cell Technologies

All in all, we're entering the next era of humanmachine partnerships.

But leaders are divided regarding what this means for them, their business and the world at large.

Leaders are struggling with the pace of change

R

D&LLTechnologies

Many aren't progressing quickly or deep enough

Internal Use - Confidential

ONLY 27%

say digital is ingrained in all they do

57% are struggling to keep-up with the pace of change

42%

Don't know whether they'll be able to compete over the next decade

93% Are battling some form of barrier to becoming a digital business in 2030

Top barriers to transforming digitally

Lack of a digital vision and strategy (61%)

Lack of workforce readiness (61%)

Technology constraints (51%)

Time and money constraints (37%)

Law and regulations (20%)

Internal Use - Confidential

51% admit they have ineffective cybersecurity measures in place

59% believe their workforce aren't sufficiently security savvy

However leaders are unified in the need for digital transformation

Top tips to accelerate digital transformation

- Gain employee buy-in (90%)
- 2 Make customer experience a boardroom concern (88%)
- 3 Align compensation, training and KPIs to digital goals and strategy (85%)
- 4 Put policies and tech in place to support a fully remote, flexible workforce (85%)

- 5 Empower lines of business (80%)
- 6 Teach all employees how to code / understand software development (79%)
- Appoint a chief AI officer (75%)
- 8 Automate everything and encourage customers to self-serve (74%)

Although many haven't seen their advice come to fruition within their own company.

Internal Use - Confidential

Most believe they'll hit targets within five years

Despite an ad hoc approach to digital transformation

94% believe they'll have effective cybersecurity defenses in place

90% anticipate they'll deliver their product offering as a service

89% believe they would have completed their transition to a software-defined business

85% say R&D will drive their organization forward

81% will be using AI to pre-empt customer demands

80% will be delivering hyper-connected customer experiences with VR

Top technology investments in the next 5 years

Businesses plan to triple their investments in advanced AI within five years

No. of companies investing in VR/AR will jump from 27% to 78% within five years
